

LÁZARO MANUEL CAMPOS OLIVA

Havana, Cuba

Backend developer specializing in Java and Spring Boot, with over 3 years of experience in enterprise applications. Expert in REST APIs, security, authentication, and scalable architectures. Experience with Node.js (NestJS, Express) in agile environments, applying best practices in development and continuous delivery.

Work Experience

Xetid

Havana, Cuba

Junior Backend Developer

Oct 2023 – Present

- I migrated SOAP services from WSO2 Integrator to Spring Boot in a remote banking system, modernizing service integration and facilitating its maintenance.
- I contributed to the migration of the core of a payments platform from Java 11 to Java 17, supporting the technological upgrade and sustainability of the solution.
- I am currently involved in the development of an offline wallet solution, focused on security, data synchronization, and validation of reliable payments.

Education

Camilo Cienfuegos de Capdevila Military School

Havana, Cuba

2019–2021

Celia's Presence Pre-University Institute

Havana, Cuba

2022
